EXPERIENCE

OPTIVER TRADING, Incoming Trading Intern

starting Jun 2018

WHARTON MANAGEMENT, Research Assistant

Feb 2018 – present

Researching startup success factors and analyzing government/LinkedIn/Crunchbase data with Ph.D. Candidate Andrea Contigiani

MUSE CONSULTING AT WHARTON, Project Lead, Consultant

Jan 2017 – present

One of seven Project Leads for a student-run revenue-generating consulting group focusing on brand and product marketing strategy

- Mid-stage bedding products startup (Project Lead): Creating strategy for new channel product launch and pop-up-shop launch strategy. Planned out project timeline/Gantt chart, lead team meetings, communicate with MUSE VPs and client representative.
- Fortune 500 clothing retailer: Developed a three-pronged millennial marketing strategy. Synthesized secondary research, focus group response, and Qualtrics survey of 120+ to generate six millennial shopping consumer segments. Performed competitive audit for best marketing practices and identified opportunities to enhance digital experience.
- Fortune 100 pharmaceutical: Researched digital drug representation platforms using SWOT, M&A fit frameworks.

WHARTON STATISTICS, Grader: STAT 405/705, Statistical Computing in R (Prof.s Sasha Rakhlin, Min Xu)

Jan 2018 – present

CAPITAL ONE, Business Analyst Intern, Product Management and Analytics

Jun 2017 – Aug 2017

Investigated income data source as a variable to improve underwriting for the Proactive Credit Line Increase Program team

- Queried and cleaned from large datasets (**161MM+ rows**) using **SQL**, analyzed correlations of credit behavior and income data channel variable in Excel with pivot tables (controlled for credit and risk model score variables), created data visualizations.
- Advised changes in line increase strategy for segments of customers by income data, including an opt-in program to gauge interest for customers and hold-out periods for typically higher-risk groups; presented to team Sr. Director and Managing VP.
- Recommend enhancements to current database structure to facilitate faster future analysis, compiled code on GitHub.
